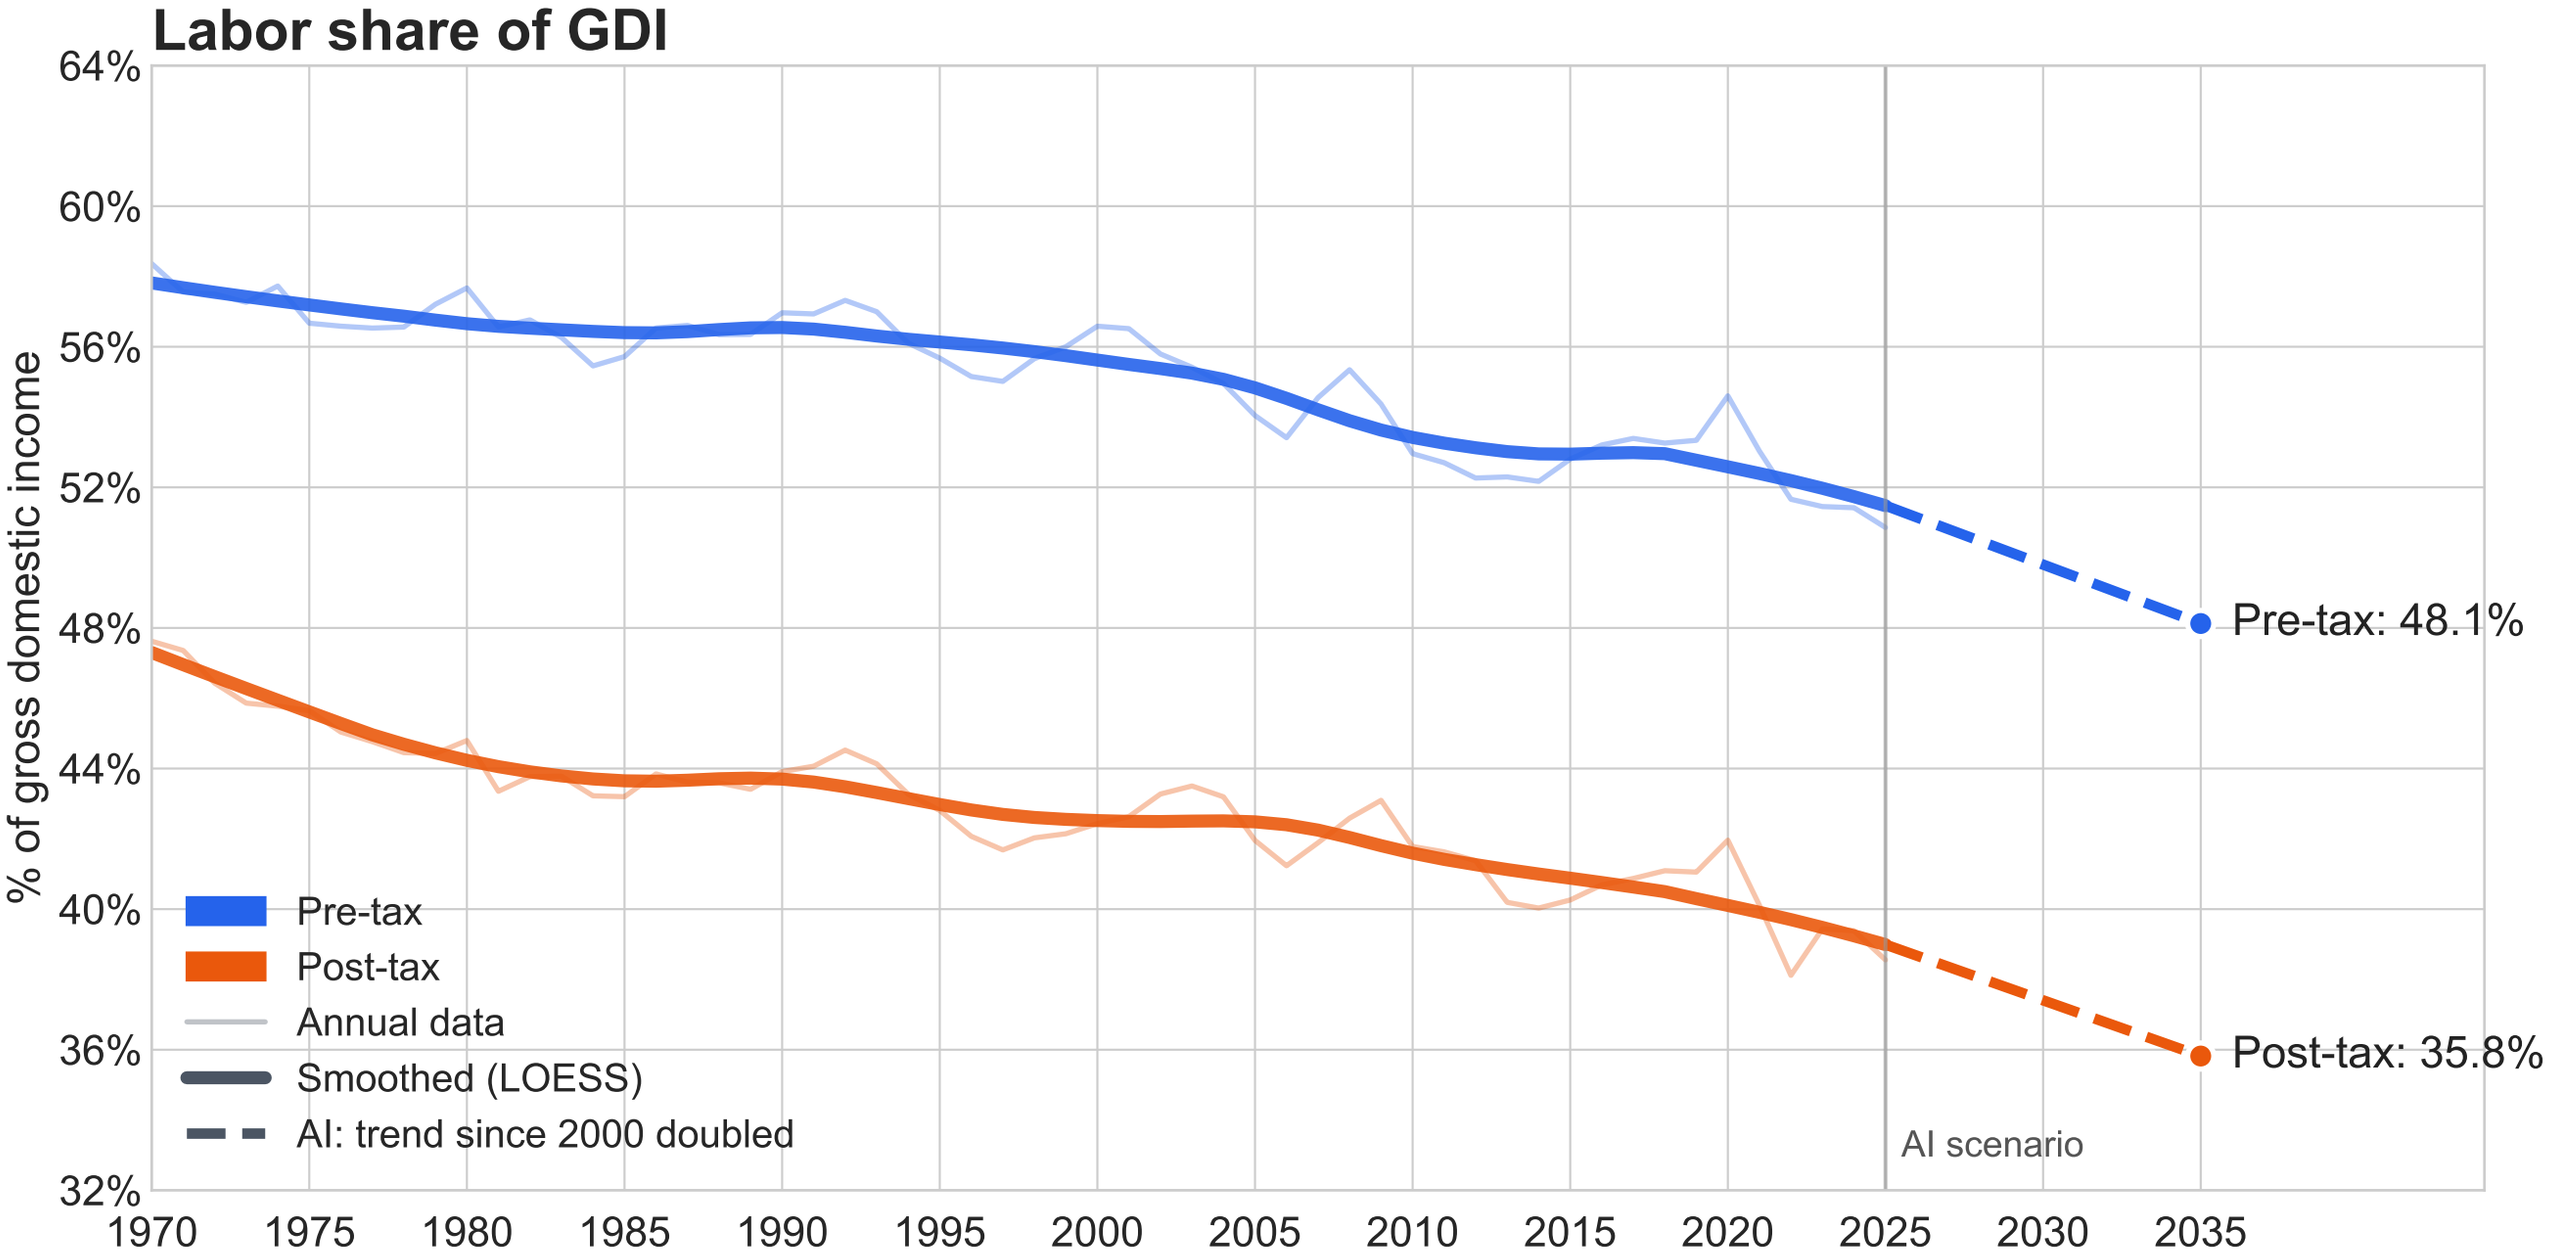
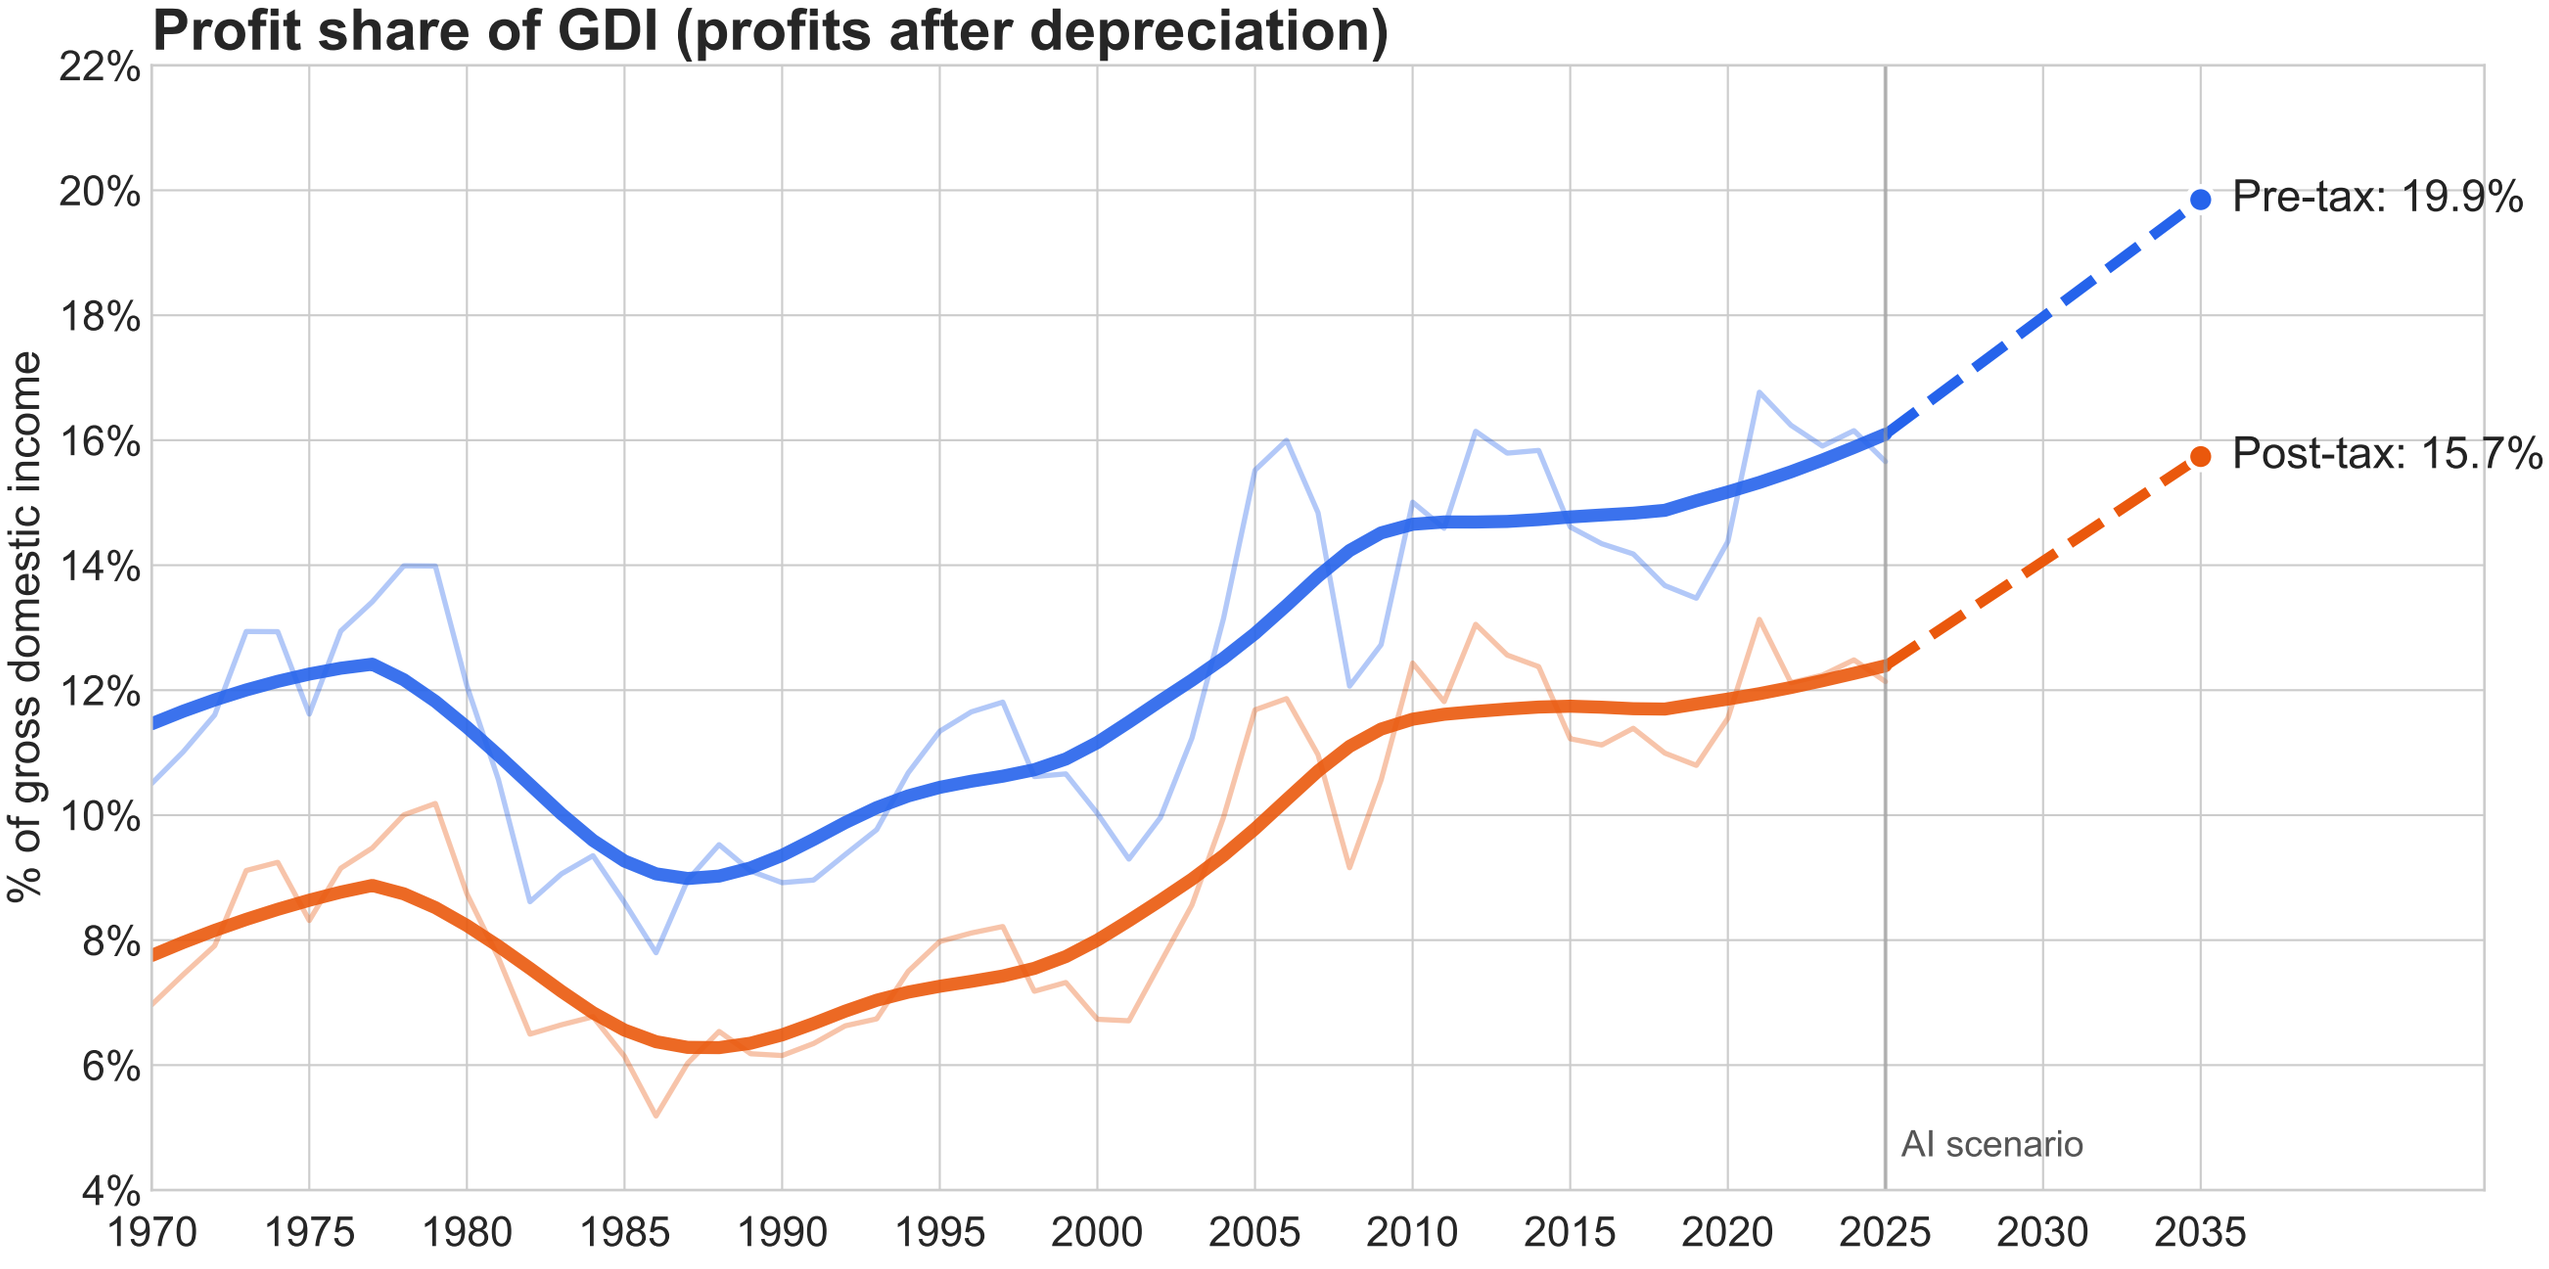
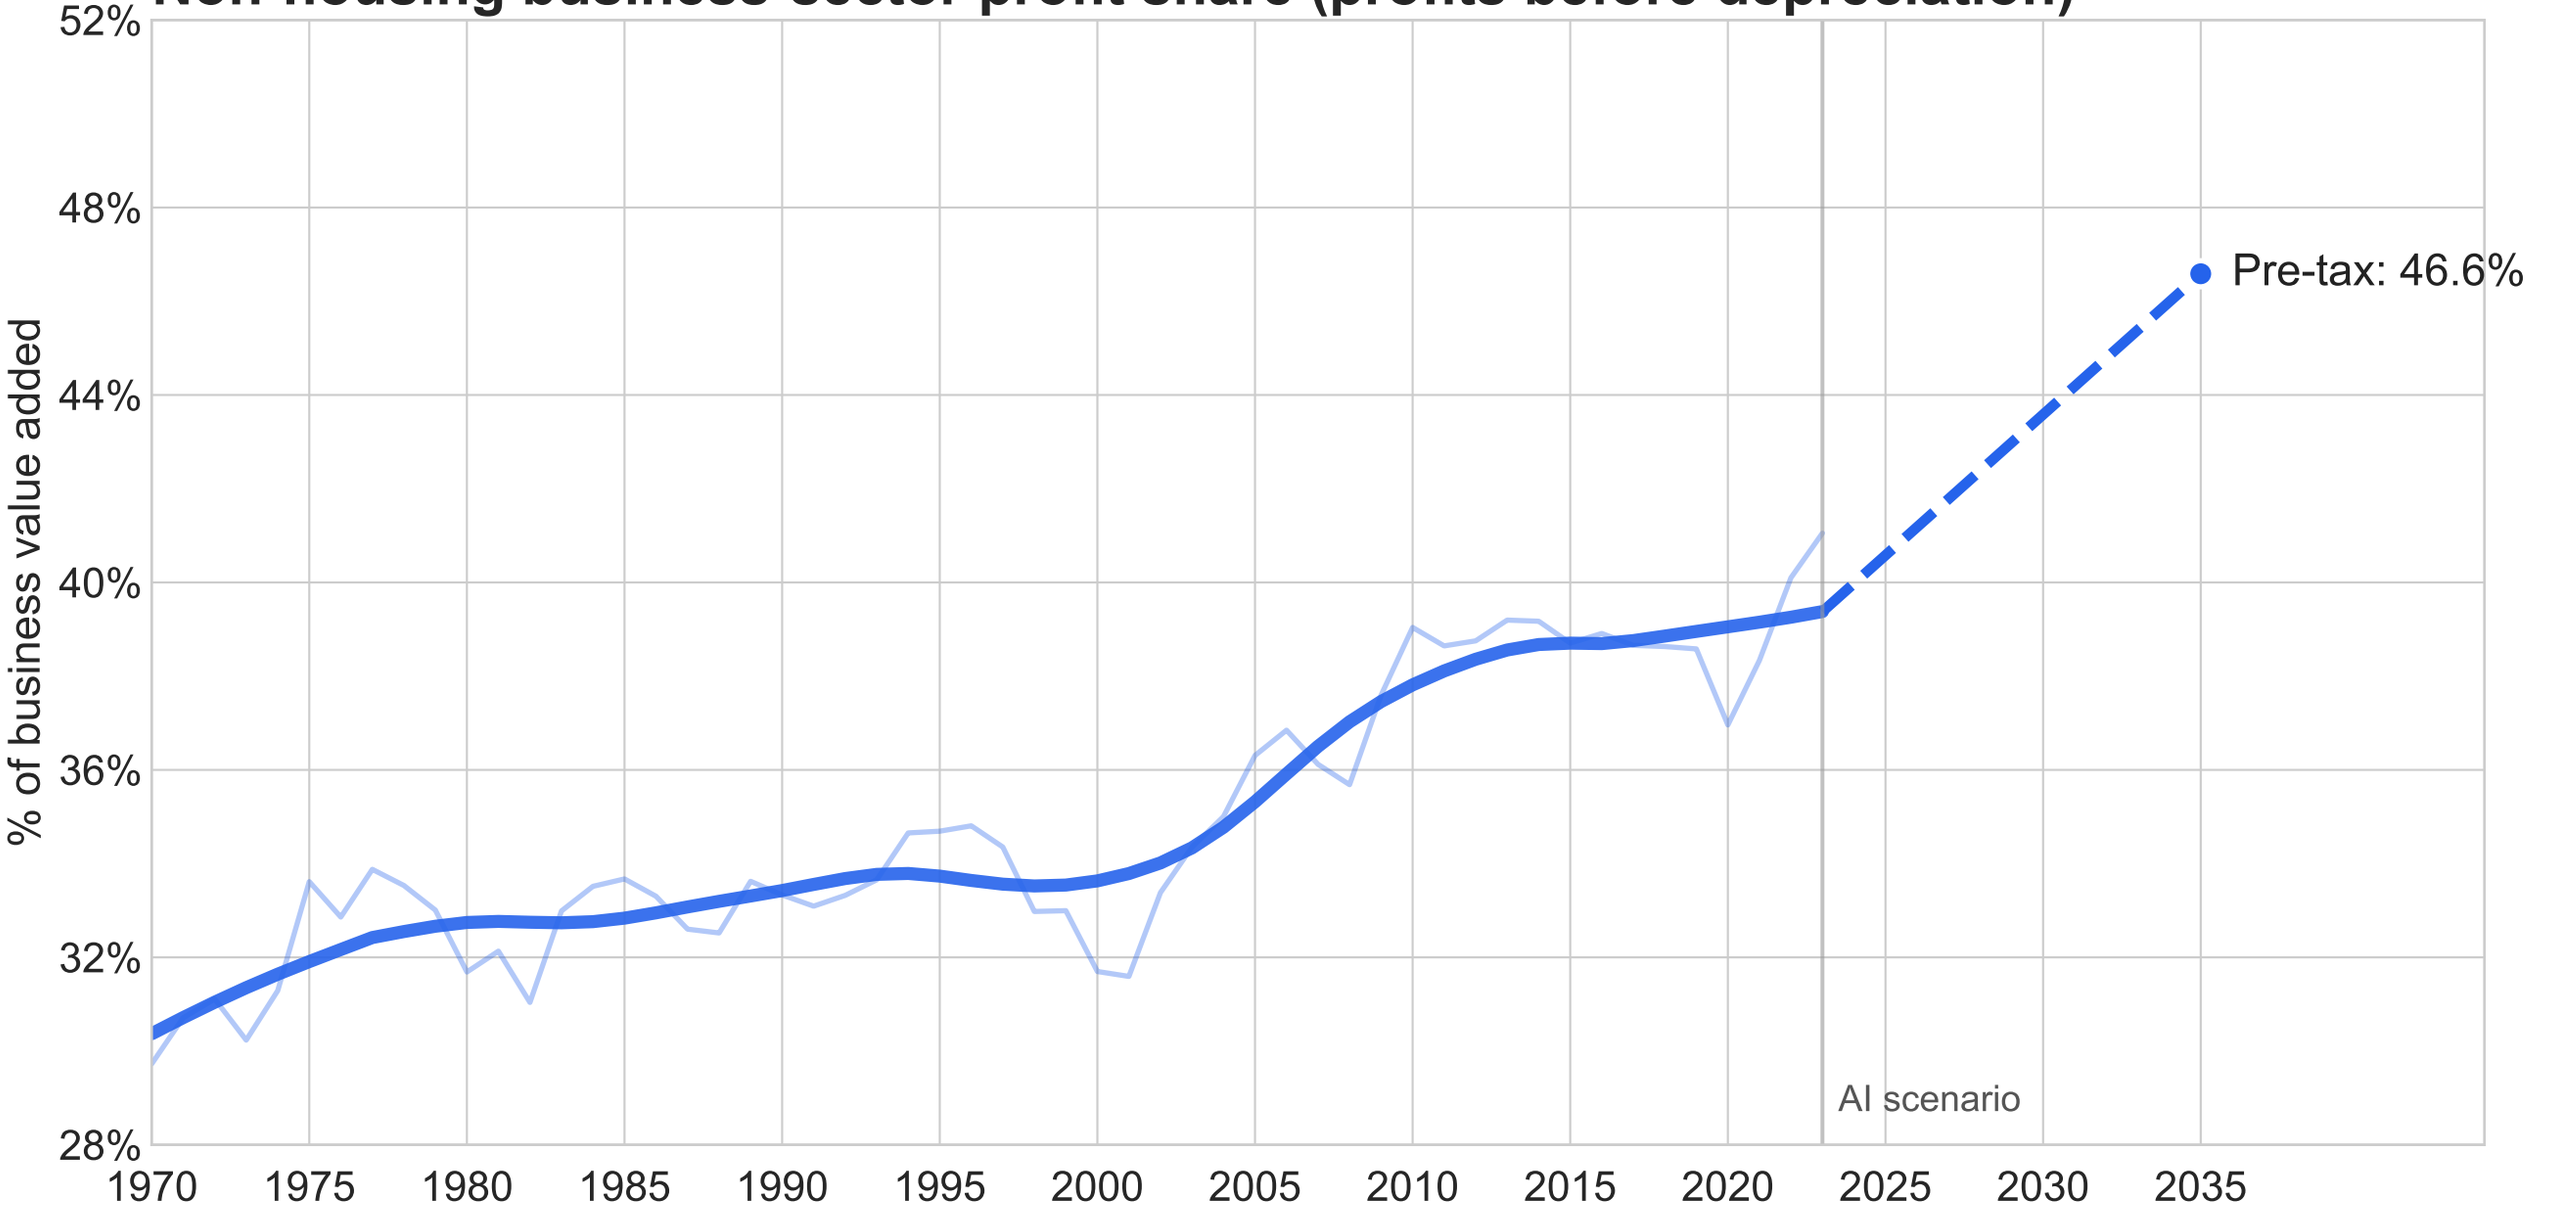
Labor share of GDI



Profit share of GDI (profits after depreciation)



Non-housing business-sector profit share (profits before depreciation)



Sources: BEA NIPA; non-housing business-sector share from github.com/IlanStrauss/business-profit-share (Gutiérrez–Piton method), which leaves out real estate. Post-tax: labor after payroll and income tax; profits after corporate and personal tax. GDI profits are corporate profits after depreciation plus 1/3 of proprietors' income. Trend = OLS slope of the annual share from 2000 to the last data year; the scenario doubles it from the smoothed last-year level (LOESS span 0.3). A mechanical scenario, not a forecast.
