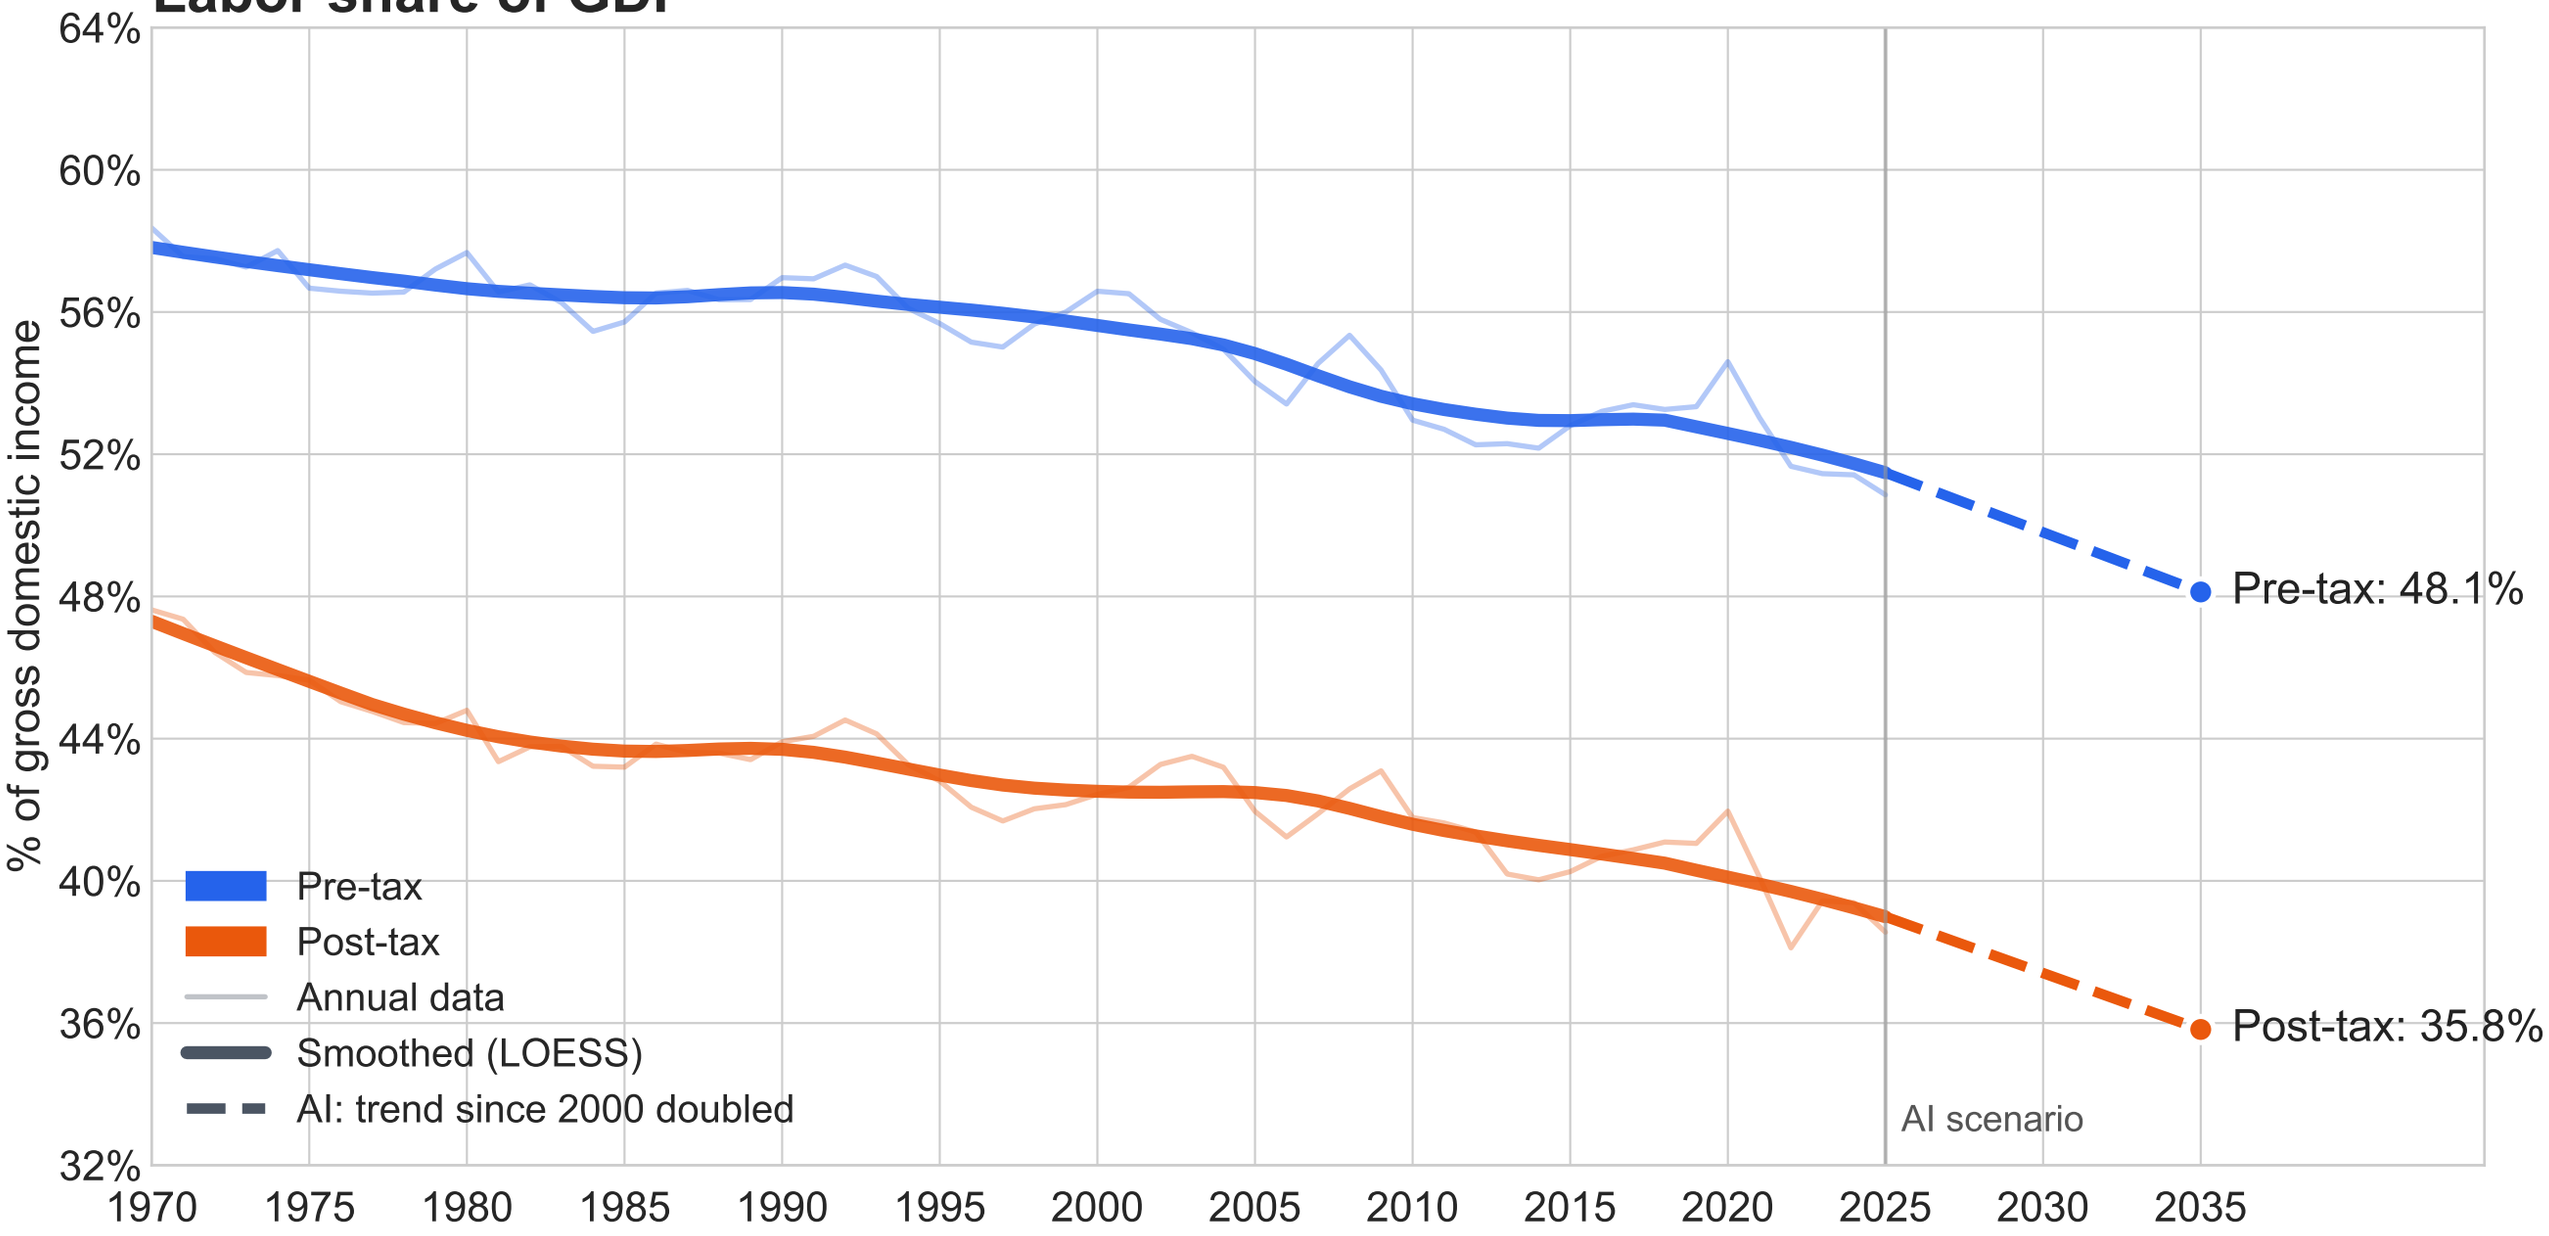
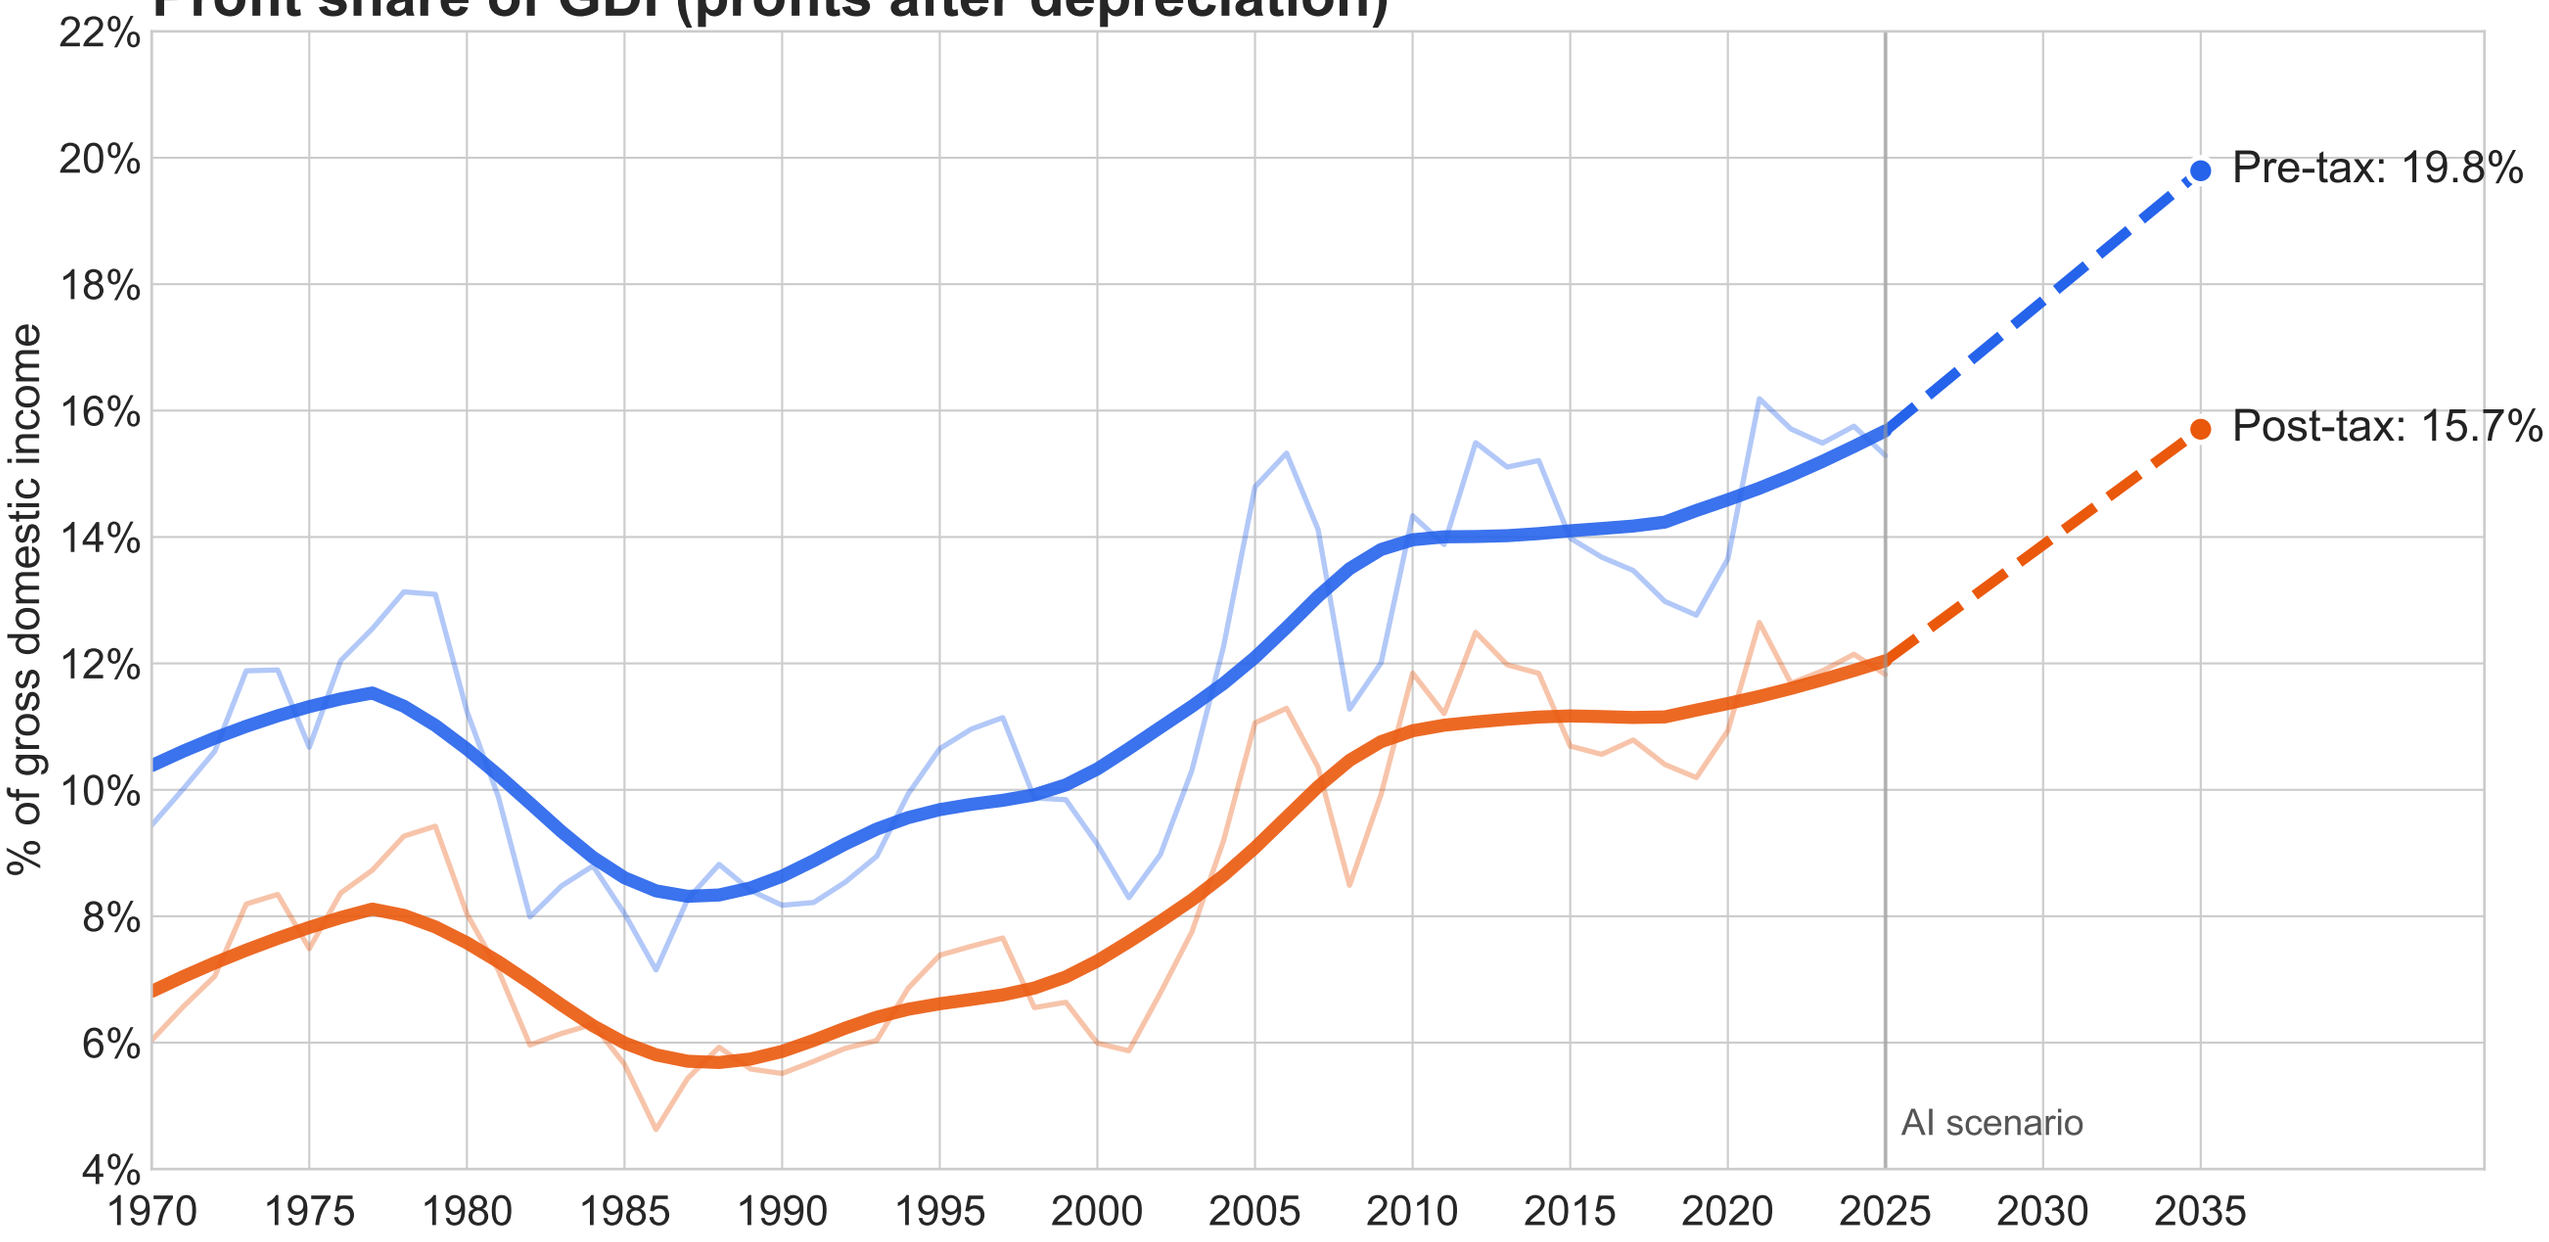
Labor share of GDI



Profit share of GDI (profits after depreciation)



Source: BEA NIPA. Post-tax: labor after payroll and income tax; profits after corporate and personal tax. Profits are corporate profits after depreciation plus the capital part of proprietors' income. Trend = OLS slope of the annual share from 2000 to the last data year; the scenario doubles it from the smoothed last-year level (LOESS span 0.3). A mechanical scenario, not a forecast.
